

Muddasir Ahmad M

Communication should be universal without any barriers or limitations.

Communications is a important right. Sometimes people with disabilities have the need for support due to complex communication needs.

Supported to develop an effective, efficient and reliable means of independent communication

Speak directly to the person rather than the person with them

Mohamed Aadil M

only refer to the person's disability if necessary or relevant

avoid saying anything that implies the person with disability is superhuman, courageous or special

Research institutions and medical facilities are using the ability to analyze massive data sets to sequence the human genome

develop new forms of treatment, accelerate and improve patient care, and better manage electronic

Sanjay Khanna S

In emergency times conveying their message is very difficult.

Since normal people are not trained on hand sign language.

It is very difficult for mute people to convey their message to normal people.

AI technology can apply to any type of disability profile.

Dhanush V

Idea
Communication should be universal without any barriers or limitations. 3

Our objective is to blend deaf and dumb within society and make them able to use their personal computers more effectively and efficiently

Developing an app will support this vulnerable society of impaired people and enhance communication among people.

Neural networks can solve somewhat complicated issues at a much easier level concerning the complexity of algorithms

Define your problem statement

What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm

PROBLEM

Define your problem statement
What problem are you trying to solve? Frame
your
problem as a How Might We statement. This will
be the
focus of your brainstorm

Key rules of brainstorming

To run an smooth and productive session

Stay in topic

Encourage wild ideas

Defer judgment.

Listen to others.

Go for volume

If possible, be visual
